

Broward County finds success with NavLogix!

Yuriy Wood says “the GE Experience has been outstanding!”

“With NavLogix, Broward County Florida, has been able to increase the efficiency of our operation by being able to find a vehicle’s exact location, identifying start and stop times to know when drivers arrive and depart appointments and determine mileage. One of the biggest advantages with NavLogix is receiving the emails alerts for speeding, excessive idling and unauthorized moving.

The installation process with GE Security was a very smooth operation and they did it with minimum interruption to our business. Overall, the experience we have had with GE Security from their salespeople to installation to technical support has been outstanding!”
