

6.5" Two-Way In-Wall Loudspeaker

R-2650-W

The affordable R-2650-W in-wall loudspeaker makes discrete audio a convincing reality for almost anyone. Built to the same exacting standards as all Klipsch products, this high-performance model doesn't suffer from the design shortcuts and sonic compromises that plague competing designs.

This exceptional speaker employs a 6.5-inch gray polymer woofer cone and 1-inch soft/silk dome tweeter to deliver mind-bending depth and clarity.

Available in a white finish, the R-2650-W can be paired with one of Klipsch's new installation kits (sold separately). Each of these revolutionary kit designs allow for increased mounting flexibility and incorporate a mud ring, wire tie and universal metal mesh wing for multi-position placement and a color-coded bracket for easy speaker size identification.

- Good sensitivity and power handling
- Single piece grille frame and rustproof aluminum grille
- IR receiver knock out
- Weatherized components

SPECIFICATIONS

FREQUENCY RESPONSE	65Hz-20kHz \pm 3dB
SENSITIVITY	91dB @ 1 watt/1 meter
NOMINAL IMPEDANCE	8 ohms
CROSSOVER FREQUENCY	1800Hz
POWER HANDLING	50 watts (200 watts peak)
